INVITATION

This is your invitation to the ninth annual Russia Power Conference and Exhibition, taking place in Moscow 28-30 March 2011. Last year's event was a resounding success for all participants, with its record attendance of over 5000 energy professionals and 140 exhibitors. This year Russia Power is co-located with HydroVision Russia, and promises to be a truly valuable experience for those with an interest in the electricity sector across the Russian Federation, from both within Russia and abroad.

A place for solutions

As electricity price deregulation advances in Russia, there are so many questions to be answered, including uncertainties over pricing, trading, market power, transparency and grid access. Russia Power will provide you with information to shed light on these issues and help you develop your business in this sector as well ensuring that you encounter the latest global technological solutions, whether it is in the nuclear, fossil fuel or renewables fields. Over the last eight years, Russia Power has tracked the remarkable restructuring process that has taken place within the electricity sector in Russia. As this process unfolds, Russia Power continues to provide a focus for discussion and strategic planning as well as plant technology and operation.

For the industry by the industry

Those best placed to judge the issues that are at the forefront in the power industry are Russia's own industry professionals and advisory community who constitute Russia Power's Advisory Board. It is these people who have given their time to create the preliminary conference programme.

Planning your visit

As a visitor to Russia Power and HydroVision Russia you will have plenty to occupy yourself over the three days of the show. The enclosed list of exhibitors will enable you to make the most of your time on the exhibition floor and, of course, everyone is welcome to attend the Joint Opening Keynote Opening Session. Conference delegates have the choice of three dual language tracks (including HydroVision Russia), Please refer to the website www.russia-power.org for regular updates. Russia Power is offering the opportunity to visit Mosenergo Combined Heat & Power Plant No. 26 (TPP-26), one of the most interesting of Moscow's power plants. Furthermore, you can meet the next generation of power industry professionals at the show, attending by invitation through our Youth Programme.

Key endorsements

Russia Power enjoys the endorsement of the Council of Power Producers and Strategic Investors as well as the Russian System Operator, who along with our Advisory Board, have kindly assisted in the development of the conference programme.

Latest information

Information regarding the conference programme, additional confirmed speakers, exhibitor lists, technical tour arrangements and contact details will be regularly updated on the website www.russia-power.org.

Join us in Moscow for an exciting event created for the industry by the industry
