

# FREE HEALTH CHECK AND REFRESHER TRAINING

FOR NEAR INFRARED BORESCOPE (NIR-B) SYSTEMS

- **ENSURE YOUR SYSTEM IS RUNNING AT ITS OPTIMAL LEVEL**
- **OBTAIN SYSTEM AND SOFTWARE SKILLS FOR OPTIMISING RESULTS**

As an existing NIR-B customer, we are offering you and your team a **FREE REMOTE** health check and refresher training session to ensure peak performance and maximum return on investment of your system, both instrument and software.

During the session we will focus on:

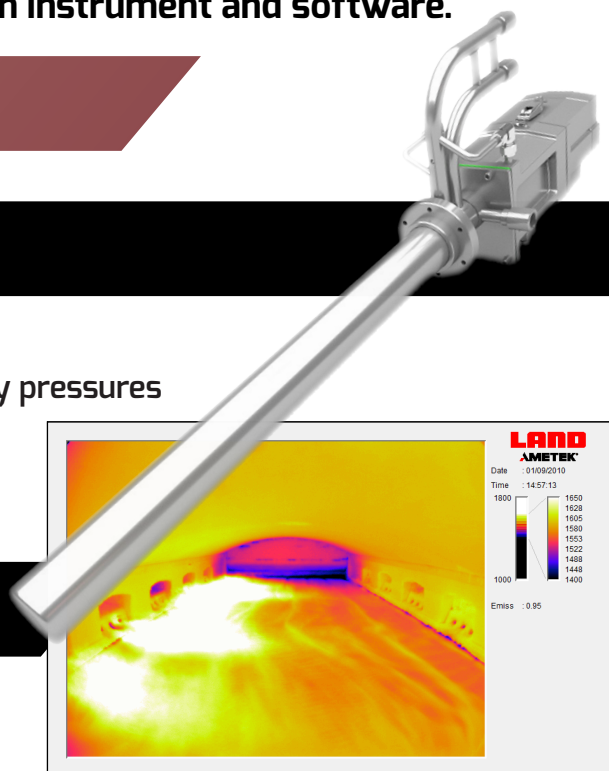

## Health Check

- ✓ Confirm daily, weekly and monthly maintenance tasks
- ✓ Review environmental conditions and water and air quality pressures
- ✓ Consider lens cleaning frequency and procedure
- ✓ Undertake additional overall system performance checks
- ✓ Review any existing issues and questions

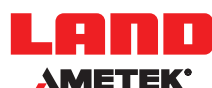

## Refresher Training

- ✓ Build system operation technical proficiency
- ✓ Understand system maintenance and cleaning tasks
- ✓ Use LIPS software key features and understand benefits
- ✓ Interpret data from LIPS for process optimisation

In addition, we can demonstrate the latest NIR-B-2K thermal imager, which now offers an outstanding definition of nearly 3 million pixels (1968 x 1472), and the latest IMAGEPro advanced thermal image processing software for controlling, monitoring, analysing and capturing imager data.
