

## AMETEK LAND Product Notification: R4 System 4 Low Temperature Ratio Pyrometer

Dear Customer

Land Instruments International Ltd. part of AMETEK Inc. formally announce that from the 1st May 2016 the R4 System 4 Low Temperature Ratio pyrometer (models R423 and R429) will be discontinued from new product sales.

A last time buy (LTB) opportunity is currently available for the R4 models and orders will be accepted to the 1st May 2016. Whilst the product has been stopped for new product sales the system is fully supported by our qualified field and factory service teams and our internal technical support engineers.

As an R4 user you will have experienced that the instrument is extremely reliable provided it is fully maintained. A full range of spare parts are available from AMETEK Land and will continue to be supplied as standard items until 1st May 2021.

AMETEK Land recently announced the launch of the SPOT R210 (125 to 1100°C / 257 to 2012°F) range that covers and exceeds the R4 pyrometer temperature measurement specification with superior digital processing and performance specifications. For full specification details on the SPOT R210 and an interactive online demonstration see [www.spotthermometer.com](http://www.spotthermometer.com).

Please contact our Sales Engineers for more details or queries regarding this product notification. AMETEK Land believes in supporting and partnering our customers through the life time of our products.

Iain Scott  
Director of Product and Programme Management

AMETEK Land ([landinst.com](http://landinst.com)) designs and manufactures a range of instruments for industrial non-contact temperature measurement, combustion efficiency and environmental monitoring. For more information e-mail us at [land.enquiry@ametek.co.uk](mailto:land.enquiry@ametek.co.uk).

Land Instruments International is a business unit of AMETEK, Inc. a leading global manufacturer of electronic instruments and electromechanical devices.
