DATE: 9 December 2013
TO: Land Sales & Marketing
FROM: Derek Stuart, Market Sector Manager
RE: Product Discontinuation - Model 9200 Cross-stack CO monitor

Because of a continuing low level of sales, we have decided to discontinue the Model 9200 MkII CO monitor.

The Model 9100 **is still available** and is recommended for all new applications.

The discontinuation schedule will be as follows

Deadline	Comments	Date
Final Quotations	Subject to approval by Market Sector Manager	31 December 2013
Discontinuation	Last date orders will be accepted	31 January 2014
Obsolescence Date	Support no longer available	31 January 2016

All current orders will be fulfilled and any outstanding quotations will be honoured provided the purchase order is received no later than the discontinuation date. We will maintain a full range of spares and service support until the obsolescence date. After that time, remaining spare parts will available while stocks last.

Thank you for your efforts in promoting and supporting the Model 9200 over the past 14 years.
